## Zoeller LM44 Utility Pump

The model LM44 is part of the Floor Sucker Series of pumps from Zoeller. The LM44 is an automatic pump, which is what differentiates it from the non-automatic model 44. For use in utility applications only, the LM44 will remove water from any flat surface down to 1/8". It is a ¼ horsepower pump and is adaptable for use with a standard garden hose, (fitting is included), 1-1/4" female NPT or 3/4" female NPT adaptor. The pump features a sensor on the bottom that turns the pump on when water is present; no float switch is necessary.

## Zoeller Smart Pak Plus

The Zoeller Smart Pak Plus Residential Alternator System allows you to install two automatic pumps and alternate their use. The pumps used can be up to 1/2 HP, 115 volts, 1 phase and 12 amps. The enclosure is NEMA 1 rated and intended for indoor use only and features a separate power cord and circuit for a high water alarm. The built-in alarm automatically sounds if one of the pumps should fail and require the second pump to run. It provides true alternation, allowing each pump to be used equally, not timed, hence providing extended pump life.

For more information, please contact our office or visit the Zoeller website at [www.zoeller.com](http://www.zoeller.com)

## Lenox Snips

The Lenox line of snips offer longer life, higher cutting force and better handle durability than leading competitors. Reinforced chrome silicone valve-quality wire allows more cycles on the spring before breaking. Lenox is so confident in these new springs that they will offer FREE replacement springs for the life of the snips. The comfortable grips are over-molded onto full-tang handles and won't slip or twist off. The Aviation Snips feature precision-formed blades made with High Carbon Steel, providing a stronger and longer lasting blade than cast or forged blades. The Offset Snips feature a forged lower blade provides ultimate strength and a tight turning radius. This bi-material blade design lowers the required cutting force, enhancing the ease of use.

For more information, please contact our office or visit the Lenox website at [www.lenoxtools.com](http://www.lenoxtools.com)

## **Maverick 1.28 "Green" Toilets**

Mansfield is proud to announce the **NEW** Maverick 1.28 High Efficiency Toilet Series. The new Maverick joins the Mansfield EcoQuantum and QuantumOne to provide a broader selection of high efficiency water saving products than ever before. With its 1.28 gallons per flush, the Maverick reduces water consumption up to 40%, meets the requirements of virtually all water district rebate programs and qualifies for 1 LEEDS point. The new 1.28 Mavericks are available with an elongated, elongated ADA and round front bowl. These three bowl configurations can be paired with a standard left hand flush tank, right hand flush or insulated lined tank. They utilize the proven MagnaFlush III flushing system with a 3" flush valve and 2-1/8" glazed trapway. The new Maverick 1.28 series toilets replace the Maverick 1.6 series and will be available to order July 1, 2008.

## **Mansfield Redesigned 705NS One-Piece Toilet**

The Mansfield one-piece 705 toilet has been redesigned for added performance. The new 705NS now features the high performance MagnaFlush III flushing technology for a fast and powerful flush every time. It also features the new model 204 three-inch flush valve that virtually eliminates any clogging. Available only in an elongated front, this one-piece toilet it is ideal for both residential and commercial use.

For more information, please contact our office or visit the Mansfield website at [www.mansfieldplumbing.com](http://www.mansfieldplumbing.com)

## **Mansfield Wall Hydrant Case Quantities**

Within the next several months, Prier will be changing all case quantities on Mansfield Wall Hydrants and Ballcocks from 20 pieces to 24 pieces. The current case quantity on Prier items is 24 pieces and by making these changes, Prier will consolidate purchases and make one box for all Prier and Mansfield hydrants. Prier does not have a broken carton charge for case quantities, so no customer will be penalized for ordering less than case quantity. As the change date gets closer, we will send out a reminder so appropriate changes can be made in your systems.

## **Old Mansfield flush valves**

The old Mansfield 2075 flush valves are no longer available. Mansfield discontinued this item previous to Prier assuming the brass division. There are two repair kits that are still available for the 2075, which can be purchased through Prier Products.

For more information, please contact our office or visit the Prier website at [www.prier.com](http://www.prier.com)

## Fernco Pow-R Products

Fernco is proud to announce their new line of Pow-R Repair Products. These products are the fastest and easiest way to stop an emergency leak or when a traditional method of repair is not feasible. The Pow-R Repair Products include Pow-R Wrap, Pow-R Patch and Pow-R Stick. All three products are designed to fill, bond, patch, strengthen, plug and repair leaks, creating a 100% sealed repair with the need for any tools.

Pow-R Wrap is a water activated fiberglass wrap used for repairs on virtually every kind of pipe and hose. It's an alternative to traditional methods such as cementing, soldering, or welding. The Pow-R Wrap works on wet, dry, clean, dirty or corroded pipes. Pow-R Wrap is impervious to water, oils, chemicals, solvents and acids and can even be used under water. It comes as a self contained kit that includes resin impregnated fiberglass tape, Pow-R Stick epoxy putty, 1 pair of gloves and complete installation instructions. There are three convenient sizes to choose from depending on the pipe diameter.

Pow-R Stick is a hand workable, steel reinforced epoxy putty that cures within minutes of mixing. Pow-R Stick is adhesive to a wide range of materials and will not rust or oxide. It will seal, rebuild, fills, bond, insulate, patch, plug and strengthen and is impervious to water, oils, chemicals, solvents and acids. Available in copper, grey and white, Pow-R Stick can be purchased individually or all in one triple pack.

Pow-R Patch is a fiberglass cloth used to cover holes or cracks in need of repair. Pow-R Patch will set on wet or dry surfaces and will adhere to PVC, metal, wood, fiberglass, plastic and more. Each repair kit includes a pre-coated fiberglass cloth in a self-contained mixing pouch, protective gloves and installation instructions. No additional tools are necessary and the Pow-R Patch is perfect for flat and round surface repairs.

For more information, please contact our office or visit the Fernco website at [www.fernco.com](http://www.fernco.com)

## Blanco Cascade

The new Blanco Performa "Cascade" Super Single bowl is the latest addition to the Performa Silgranit series. With an inside width of 21-1/2", the large left-hand bowl provides easy clean-up of baking pans and cookie sheets. The smaller right-hand bowl acts as a functional drain ledge for hands-free rinsing and drying rack. It has a convex-style self-draining feature with invisible drain channels for efficient 100% drainage of liquids. The two bowls are separated by a low divide for ease of clean-up. Custom accessories, such as grids and mesh colander, are available to fit perfectly to the sink. The Cascade is available in all five Silgranit colors.

For more information, please contact our office or visit the Blanco website at [www.blancoamerica.com](http://www.blancoamerica.com)
